

SYSTEM 3000 LIBRARY SHELVING

Comparison of System 3000 vs. Welded Frame

MJ Industries
Top Shelf Solutions For Today's Libraries.

Introducing...System 3000

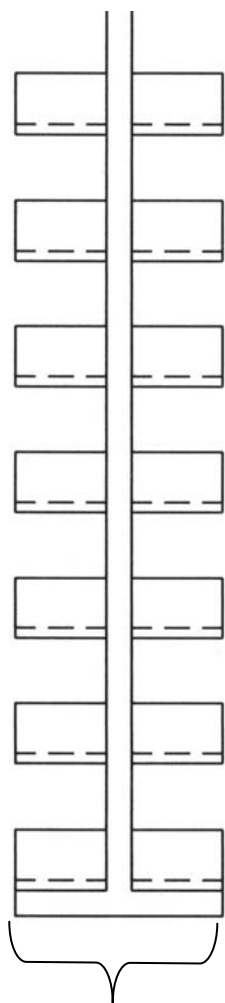

System 3000 is the industry's most advanced and cost-effective single-slot library shelving system

Benefits Over Welded Frame Shelving

1. Narrower footprint → ADA compliance and wider aisles
2. Additional storage space due to single slot design
3. Thicker shelves prevent shelf deflection over time
4. Hundreds of accessories to store various collections
5. System can be made into any height, width or depth; can also grow in height over time
6. Clean, streamlined appearance

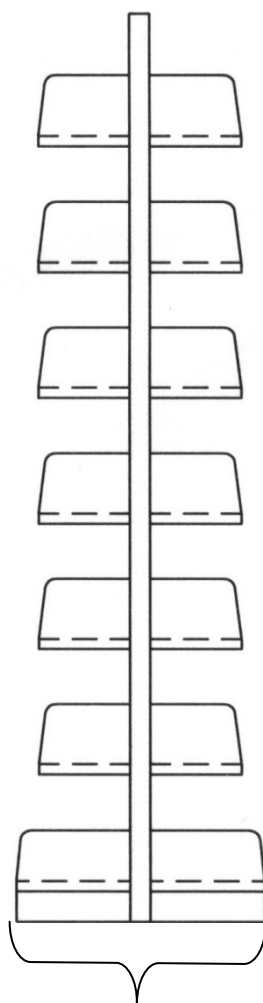

Narrower Base = Wider Aisle Spaces

20 inches

Welded Frame

24 inches

System 3000 provides an additional 4" for each range of double-faced shelving

More Storage Space

System 3000

Single-slot design and flat brackets allow for 2% additional storage space

Welded Frame

Dual frames limit storage space and causes brackets to “V”

Can Grow in Height Over Time

Column Extender

<u>CATALOG NO.</u>	<u>SIZE</u>	<u>WEIGHT</u>
S3-CEXT12	12"	4

Used to increase the height of a unit. Splice plate of extender is bolted to the column where the top cross bar was located. Top cross bar is then rebolted at the top of the extender. Wall anchors are not included.

Additional Benefits of System 3000

- Overhead fastening or floor bracing are not required to remain freestanding
- Snap Together design allows for faster installation and much greater flexibility for reconfiguration
- Can accommodate virtually any style or type of end panels, or be installed without end panels to manage cost
- Can be installed with an open base to reduce clutter and produce a more spacious look in increasingly crowded library spaces
- Can be re-leveled while being completely loaded; welded frame shelving must be unloaded first
