The select veneers, colour process and hardwood finishes from Palmieri Furniture achieve the highest aesthetic and performance standards in furniture excellence.

PALMIERI

Palmieri Furniture

Palmieri Furniture offers libraries an extensive selection of premium wood, metal paint and laminate finishes. This provides you with exceptional quality and unique design opportunities.

WOOD SAMPLES

The select veneers, colour process and hardwood finishes from Palmieri Furniture Limited achieve the highest aesthetic and performance standards in furniture excellence. Different wood species offer unique texture and grain. Minor variations in finish colour and value may occur due to the natural characteristics of wood. All wood materials shall be inspected and treated with a final sanding and polishing operation before any staining and final finishing can be performed. All machine and mill marks are to be removed. Once the polishing and sanding has been performed, the furniture will then undergo the following stain and finish procedures.

Step 1

A base stain will be uniformly applied, wiped and then allowed to dry.

Step 2

A uniform coat of sealer will be applied and allowed to dry.

Step 3

Sealer will be sanded using 320 grit silicon paper.

Every endeavor has been made to match the printed samples to the actual product available. Upon evaluation, please remember that wood products are naturally subject to variations in grain pattern density and wood colour. Exact duplication of these samples is not possible.

Step 4

A coat of shader will be applied to even out colour uniformly and enhance colour appearance.

Step 5

A Catalytic lacquered of 40-45 degree sheen is evenly applied and allowed to dry under factory controlled conditions. All product is oven cured.

Due to the limitations of the printing process and the effects of heat, light and time on the colour swatches, we cannot guarantee that the colour and the gloss of the furniture will match this selector exactly. Where colour selection is important, please refer to the actual samples before specifying.

PLASTIC LAMINATES

Our laminates are designed for either horizontal, vertical or postforming applications. General Purpose Grade Nominal Thickness 0.0048"/1.2 MM. Laminates shall conform to standards set by the National Electrical Manufacturers' Association (NEMA GP50). Printed colours and patterns are reproduced from representative segments of large sheets and may differ slightly from actual product. Please refer to actual samples before specifying.

METAL FINISHES

All metal components are thoroughly cleaned and coated electrostatically with an epoxy powder coat paint finish. The metal components are then oven baked and cured for a long lasting finish.
